Zisel Jewelry · Print business cards (3 concepts), rev 3

Revised: Monday Oct 19, 2026, ~8:30 PM PDT (rev 2: navy on both sides, metallic gold shimmer, gold border band like the poster). **Rev 3 / 3b, ~9:45 PM PDT:** concept A back only (see below); A front, B and C unchanged. For Jonathan Shulkin (owner). **Status:** concepts for Jonathan Yu to choose from, not sent.

Front: Zisel logo only. It's built the same way as the approved logo: Playfair "Zısel", the white diamond with metallic-gold edges, and metallic-gold "JEWELRY". **Back (B, C):** Jonathan Shulkin / ZISEL JEWELRY / Wholesale Diamond & Fine Jewelry / 725.254.6937 / Las Vegas, Nevada. **Back (A, rev 3b):** Jonathan Shulkin / Book a Private Showing / WHOLESALE DIAMOND & FINE JEWELRY / gold rule / 725.254.6937 / Las Vegas, Nevada / Viewing by appointment only. **Not on the card:** website, email, street address, job title.

All concepts, both sides: navy panel, plus a wide metallic-gold band along the card edge (0.14 in visible inside trim, running out through the full 0.125 in bleed) with a thin gold hairline inset 5 pt inside it. This follows the invite poster.

Concepts

	Front	Back
A · Gold Frame Classic	Logo centered; band + hairline + a second fine inner frame (double rule)	**Rev 3b (~9:45 PM):** type and colours matched to the trailer end card (`trailer/src/end.html`). Centered: white name (Playfair 12.5 pt) / **Book a Private Showing** Playfair 10.5 pt, soft champagne/rose-gold shimmer / **WHOLESALE DIAMOND & FINE JEWELRY** ivory Montserrat SemiBold caps 6 pt, 0.2 em tracking / gold rule / gold phone 10 pt / Las Vegas, Nevada 7 pt / *Viewing by appointment only* ivory Playfair Italic 6.5 pt. Rev 3b swapped the slogan above the WHOLESALE line (styles unchanged). ZISEL JEWELRY removed. Block centered inside the inner frame: 14.8 / 14.9 pt above/below, 24.5 pt each side; 3.4–5.5 pt of space between lines, with the rule centered between WHOLESALE and the phone. Same double frame.
B · Midnight	Logo centered (slightly larger); band + hairline	Left-aligned: gold name and phone, white ZISEL JEWELRY, short gold divider, small diamond accent at right
C · Diamond Divider	Largest logo; band + hairline, no inner frame	Centered: gold name, white ZISEL JEWELRY, gold rule–diamond–rule divider, white phone

Preview:

A · Gold Frame Classic

FRONT · 3.5 × 2 in trim

BACK · 3.5 × 2 in trim

B · Midnight

FRONT · 3.5 × 2 in trim

BACK · 3.5 × 2 in trim

C · Diamond Divider

FRONT · 3.5 × 2 in trim

BACK · 3.5 × 2 in trim

Files

File	What
`zisel-business-card-{A,B,C}_print-bleed_CMYK.pdf`	**Print-ready**, 2 pages (front, back), 3.75 × 2.25 in incl. 0.125 in bleed, no marks. TrimBox/BleedBox set.

File	What
`zisel-business-card-{A,B,C}_print-crop-marks_CMYK.pdf`	Same, on a 4.25 × 2.75 in sheet with crop marks outside the bleed.
`rgb/…_RGB.pdf`	Same artwork in DeviceRGB (screen / digital proofing).
`zisel-business-card-{A,B,C}_preview.png`	Front and back side by side at trim size, rendered from the CMYK PDF at 600 dpi (Ghostscript).
`zisel-business-card-concepts.png`	All 3 concepts (copy at `/workspace/zisel/business-card-concepts.png`). A-only rev 3 preview: `/workspace/zisel/business-card-A-rev3.png`.
`src/concepts.py`	**Edit here:** text, inks, gradient stops, band/hairline sizes, per-concept options.
`src/build.py`	Rebuilds everything: `cd src && python3 build.py` (needs reportlab, uharfbuzz, fonttools, shapely, Pillow, ghostscript).
`src/fonts/`	Static instances of the brand fonts (Playfair Display 400/500 + Italic 400, Montserrat 500/600; SIL OFL).
`src/gem.svg`	Logo diamond (copied from `invite/gem.svg`; its polygons and gradient are reproduced in `build.py`).

Print specs

- **Size:** trim 3.5 × 2 in (US), bleed 0.125 in on each side, safe zone 0.125 in inside trim.
- **Placement (checked at 600 dpi):** all text and logos sit ≥ 25 pt inside the safe line and ≥ 17 pt clear of the inner frame line. The gold band is 10 pt visible inside trim, so a slightly off-center cut stays even.
- **Vector:** 100% vector, with no raster images. **Text is outlined** (HarfBuzz-shaped with kerning, then converted to paths), so the PDFs contain no fonts at all.
- **Gold shimmer:** this is the brand metallic gradient from `invite/zisel.css` (`#7a5a14 → #c99a3a → #fff1b8 → #d8b35a → #8f6b1e → #e8c870 → #fff5cc → #a97d25`). It's written as native PDF axial shadings in DeviceCMYK, so it prints as a smooth gradient. At 600 dpi the largest step between neighbouring pixels in the band is 2/255, with no banding. The diamond edges use the gem.svg gradient (`#7a5a14 → #fff1b8 → #b8892c → #f3dc8f`).
- **Type sizes:** name 13.5 pt Playfair, tagline 8 pt Playfair Italic, "ZISEL JEWELRY" (B, C) 6.5 pt Montserrat SemiBold tracked; A back: WHOLESALE caps 6 pt, "Book a Private Showing" 10.5 pt, "Viewing by appointment only" 6.5 pt italic, name 12.5 pt; **phone 10 pt** Montserrat SemiBold, location 7 pt Montserrat Medium, logo "JEWELRY" ≈ 8–9 pt.
- **Color:**
- Gold and light inks were converted sRGB → CMYK with Ghostscript's "Artifex CMYK SWOP" profile, not the printer's own profile.
- Navy is hand-set to **C100 M70 Y5 K80**. The straight profile conversion of #0d1f45 gave a muddy C89 M78 Y48 K73 at 288% ink.
- Ask the printer for a hard or soft proof, especially for the navy.
- **Foil option:** if the printer offers it, the gold areas can be sent for **gold foil** (band, hairlines, gold type, dividers, diamond edges). Real foil looks metallic, which a CMYK gradient can only imitate. Ask the printer how they want the foil separation (usually a 100% K spot layer named "Foil" matching the gold shapes); we can produce that from `build.py`.
- **Champagne shimmer** (A, "Book a Private Showing"): `#b98d5c → #e6c39a → #fbecd2 → #dcb48a → #f3dcbc → #c49a6c`, a softer, warmer cut of the brand gold. The end card source uses the standard brand gold; the rose tint in the photo reference comes partly from the camera. Ivory for the white lines: `#f8f2e4`.

Vistaprint upload file (card A)

Added Tuesday Oct 20, 2026, ~7:55 AM PDT. `vistaprint/zisel-business-card-A_vistaprint_3.61x2.11_CMYK.pdf` is card A rev 3b cut down to Vistaprint's upload size: **3.61 × 2.11 in** with bleed (trim 3.5 × 2 in, bleed ≈ 0.055 in per side), read from the Specs & Templates panel on the Soft Touch Business Cards page. Same vector artwork and CMYK inks (navy stays C100 M70 Y5 K80); only the outer 0.07 in of bleed is trimmed, so the gold band still runs off every edge. Page 1 front, page 2 back. Preview: `vistaprint/zise`

`l-business-card-A_vistaprint_preview.png`. If card A changes, rebuild the main PDF first, then re-crop it (inset 5.04 pt per side). Check the spec panel again if you order a different Vistaprint card.
